Dimensions / Spacings

Basic module

spacing	25x25	27x27	30x30
A	98.0 mm	105.0 mm	116.0 mm
B	65.0 mm	70.0 mm	73.0 mm
C	11.5 mm	10.8 mm	12.5 mm
D	25.0 mm	27.0 mm	30.0 mm
E	11.5 mm	13.4 mm	13.4 mm

Expansion module

spacing	25x25	27x27	30x30
A	97.0 mm	104.0 mm	113.0 mm
B	47.0 mm	53.0 mm	58.0 mm
C	11.5 mm	10.8 mm	11.0 mm
D	25.0 mm	27.0 mm	30.0 mm
E	11.5 mm	13.3 mm	14.0 mm

 Further expansion modules can be arranged in the same spacing at three outer edges of the basic module.

Modular Bus Operating Concept

The basic idea was to develop an operating concept that makes us flexible enough to provide low-cost up to high-end solutions. The result is a future-proof and dynamic system to integrate contemporary design and state-of-the-art technology in modern machine concepts and panel layouts. The modular operating concept provides for project planning either standardised modules in a fixed grid spacing or the possibility to respond individually to customer-specific designs. The modular operating concept consists of two basic modules, the bus-specific basic module and the bus-independent expansion module. The basic module includes the typical bus connection as well as the bus node for communication with the corresponding bus system. The expansion module serves as a bus-independent I/O expansion in conjunction with the basic module, which enables us to integrate up to 128 command positions with 128 indicator lamps. The system power supply of the expansion modules is effected via the basic module, thus, reducing handling to a minimum. Each module is constructed with 8 inputs for contact blocks and 8 outputs for the LED indicator lamps. We distinguish in this modular operating concept two basic applications, control panel construction in which all command points are summarised on one area, and plant engineering & construction with several command points, which are distributed in the system.

Customised - fast - cost-effective

If your design plans cannot be implemented with the standardised modules, we can respond to your special design requirements anyway. For customised designs we resort to sub-modules of the modular operating concept while adapting the carrier card with the command points (PCB with individual contact blocks) according to your design proposal, consequently, the cost-optimised concept also taking effect here.

Technical Description - Control Panel Construction / Plant Engineering & Construction

Control Panel Construction

For the control panel construction, we consider the arrangement of the command points on one control unit, on which we can set up max. 64 command points with 64 indicator lamps. The 8 modules are then connected through with a ribbon cable. The individual modules can be arranged in a max. distance of 250mm to each other.

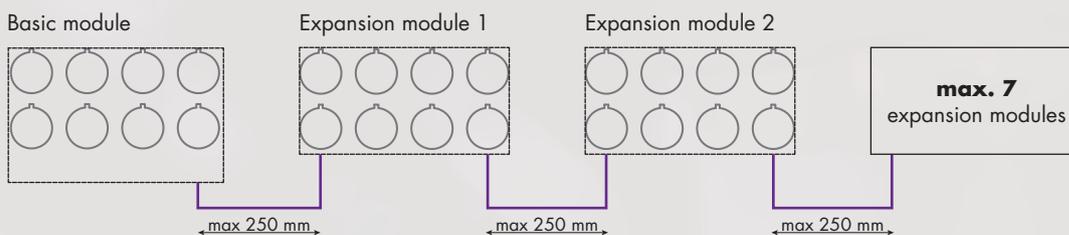

Plant Engineering & Construction

In the plant engineering & construction we consider the complete plant, which usually has a main control panel and several secondary control panels. In this case, the main control panel is equipped with the basic module and according to your operating concept, with additional expansion modules. The bus node with the typical bus connection is also arranged in the main control panel. It is then possible to equip more secondary control panels with expansion modules and to operate them via the main control panels using the bus data. In this application you can operate max. 128 command positions with 128 pilot lamps, and this at a cable length of 5m between the command positions and a total length of 30m within the plant.

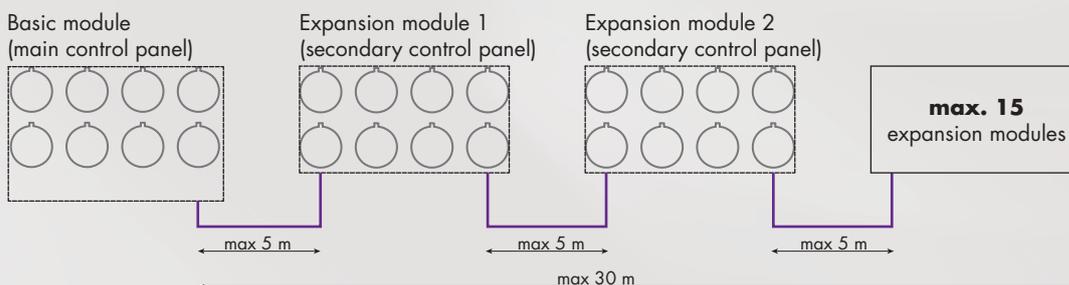

Mounting of Standard Modules

We offer the standardised modules in fixed grid spacings of 25 x 25mm, 27 x 27mm or 30 x 30mm. The modules are plugged on the actuators in the front panel and secured to the contact blocks by means of a locking bolt. Therefore, no additional spacers are needed in the front panel to mount the modules. The basic module is supplied with a supply voltage of +24V/DC and the bus signal. The expansion modules are connected to each other by means of a connecting cable, thus, there is no need for an additional wiring by what the wiring outlay reduces enormously. The individual modules can be attached in the same spacing.

Control Panel Construction

Plant Engineering & Construction

CANopen Basic Module

CANopen Bus System ISO11898
 CiA Standard DS401 version 2.0
 Addressing: DIP switch
 Baud rate: 10kbit up to 1Mbit are automatically detected by the bus
 I/Os: 8 I/Os, 8 inputs and 8 outputs, expandable to max. 64 I/Os for control panel construction and 128 I/Os for plant engineering and construction
 Bus connection: 3-pole screw terminal
 Bus termination: can be activated via sliding switch

E_BTK8IO_0102

Ultra-bright LED, T5,5K socket, 24V

with integrated series resistor and half-wave rectifier, for 24 V AC/DC (7/14 mA)
 When connecting to DC, the correct polarity must be observed:
 + ... X1/- ... X2
 storage temperature: -25°C ... +80°C
 ambient temperature: -20°C ... +60°C
 voltage tolerance: + 10 %
 colour white

L5,5K24UW

Connecting Cable for control panel construction

Length: 50 mm **VK_BTK_001_50**
 Length: 100 mm **VK_BTK_001_100**
 Length: 220 mm **VK_BTK_001_220**

Connecting Cable for plant engineering & construction

Length: 90 mm **VK_BTK_002_90**
 Length: 140 mm **VK_BTK_002_140**
 Length: 300 mm **VK_BTK_002_300**

Type Index

AS-Interface Module

I/Os: 8 I/Os, 8 inputs and 8 Ausgänge
 AS-Interface specification: V3.0
 AS-Interface profile: S-7.A.7.A
 Communication protocol: CTT3 for Master M4
 Diagnostics: Data communication error signalling unit S5
 Protocol or peripheral error signalling unit S6
 Bus connection: 2pole screw clamp
 Connecting cable: max. network length: 100m (without repeater)
 max. cycle time: ≤40ms

LED voltage supply via the bus

Application Area	Control Panel Construction / Plant Engineering and Construction	spacing 25 x 25 mm	spacing 27 x 27 mm	spacing 30 x 30 mm
8 contact blocks with snap action function (CTP) and 8 integrated white LEDs		ASI_BTK25_01	ASI_BTK27_01	ASI_BTK30_01
8 contact blocks with snap-action function (CTLP) to accept 8 pluggable LEDs L5,5K <i>Please order the LEDs separately</i>		ASI_BTK25_02	ASI_BTK27_02	ASI_BTK30_02
